

We can help you put it all together.

GRANT AND CONTRACT SERVICES

You probably know that SIUC grant and contract proposals to external agencies must be processed through the Office of Research Development and Administration (ORDA). But you may not know how much assistance is available to you through our office if you work with us early on.

Information: Visit our comprehensive web site, www.orda.siu.edu, which includes an online **Sponsored Project Guide**. Let our information specialist know your interests and he'll send you program notices in your area. Sign up with Community of Science, www.cos.com, for customized funding alerts (covers all disciplines, not just science).

Proposal assistance: Need to bounce around ideas about developing a proposal, or matching an idea to a funding agency? Looking for advice on proposal writing or budget development? Want to strategize about a resubmission? Give us a call. We can provide consultation on all these issues. We also offer grant-related workshops on request for faculty and students.

Grant management: We handle award negotiations, account set-up, subcontracts, rebudgeting, no-cost extensions, and more. When you have an administrative problem with a grant or contract, let us know as soon as possible.
